LinkoFOG™
Fats, Oil & Grease Software

Linko™ TECHNOLOGY INC.

Easy, efficient control of your FOG program

Inventory

Build an inventory of Food Service Establishments (FSEs) in your service area.

INITIAL LIST: Import an existing list of FSEs or key FSEs into LinkoFOG as information is available. Comprehensive tracking of traps, contacts, addresses and more.

UPDATE & MAINTAIN: Add new FSEs, retire FSEs, modify contacts, update schedules, revise extraction devices.

DYNAMIC FSE LISTS: Quickly view sub-sets of FSEs: With/without traps, new, retired and more. Display in a variety of reports/spreadsheets.

MAILINGS: Automatically print educational materials, BMPs, Notice of Violations (NOV)/warnings & mailing labels.

Inspections

Inspect FSEs using pass/fail status based on facility observations of grease & solids layers within trap/interceptor.

SCHEDULE: Auto schedule inspections. Produce custom field inspection forms and task lists. Focus inspections within a geographic area to save time.

INITIAL/ONGOING INSPECTIONS: Verify existing FSEs, characterize new FSEs, identify ownership change & renovations.

GREASE TRAPS: Track grease, water and solids layers, automatically calculate % grease, 25% rule compliance.

VIOLATION DETECTION: Inspection criteria triggers violation notices. Produce custom NOV/warning letters, track compliance requirements, manage escalation process.

Maintenance Schedule

Proper maintenance reduces the amount of FOG entering your sewers.

SCHEDULE: Easily auto schedule trap cleanings for all FSEs, view schedules and history.

TRACK: Manifest ID, amount/date pumped, hauler, date of disposal. Completed submissions are rescheduled.

DETECT LATE MANIFESTS: Quickly view all late maintenance logs and/or manifest submissions.

MAILINGS: Customizable letters & mailing labels for late FSEs. Correspondence history for late submissions.

Educational Outreach

Educate FSEs to reduce the amount of oil & grease entering your system.

CREATE BMPS: Use MS Word® to create educational outreach materials and templates. Cut and paste existing materials into LinkoFOG.

RECIPIENTS: Build subsets of FSEs: With/without traps, major/minor FSEs, new vs. existing, FSEs in hot spots, etc.

MASS MAILINGS: Custom outreach materials are generated for your list of recipients in seconds. Reuse standard materials.

OUTREACH TRACKING: Generated outreach materials are logged. Easily see who has been sent materials and when.

Violations & Enforcements

Detect violations, issue NOV/warning letters, manage compliance requirements.

LATE TRAP CLEANINGS: Detect late/missing manifests, send reminders or NOV letters.

FAILED INSPECTIONS: Detect grease/solids layer exceedances, trap repair required or failed facility observation. Send NOV or warning letters.

COMPLIANCE MILESTONES: Customize enforcement response plans, reuse plans, follow-up reminders.

VIOLATION REPORTING: Comprehensive compliance reporting, complete violation history and escalations.

Sample & Result Analysis

Schedule, evaluate, track sample analysis compliance of FOG, BOD, TSS, pH & more.

ANALYSIS PARAMETERS: Schedule/track sampling for FOG, BOD, TSS, ph & temperature, limits for any/all parameters.

SCHEDULE SAMPLES: Auto schedule all samples, print sampling schedule by date due and by geographic area.

MANAGE RESULTS: Print reports summarizing sampling results over all or part of the system to identify hot spots.

VIOLATION PROCESS: Parameter exceedances are automatically detected allowing you to send NOV/warning letters and schedule follow-up compliance events.

Flexible Reporting

Customize Linko reports to make them your own.

REPORT CUSTOMIZATION: Build/modify reports to meet exact needs: Add logos, edit, add/remove report fields.

MAIL MERGE LETTERS: Copy your MS Word® letters into LinkoFOG, mass mail using your custom data sets.

CUSTOM DATA SETS: Quickly and easily make reusable groups of FSEs for reporting.

MS WORD & MS EXCEL: Export reports/letters to MS Word® and MS Excel®.

LinkoHW

Track Hauled Waste. Cradle-to-grave FOG management: Efficient verification of trap-cleaning compliance.

HAULERS: Track and report by hauler name, address, permits, contacts, vehicles, drivers.

ACTIVITIES & EVENTS: Track hauler inspections on-site or in the field, track hauler permits & associated submissions.

DISPOSAL TRACKING: Track by load or by manifest. Record hauler, manifest ID, amount pumped, truck ID and more.

DISPOSAL REPORTS: by hauler, dates, waste type, in-service area or outside service area, etc.
